SUMMARY

Seeking a challenging career in the IT industry where I can apply my technical skills and problem-solving abilities in dynamic environments. I aim to grow as a creative and adaptive engineer while continuously learning new technologies. I am looking for an organization that values skill-based growth and offers opportunities for long-term professional development.

EXPERIENCE

Aphelion Cyber | DevSecOps Developer

March 2025 - Current

- Designing and developing cybersecurity tools using Python to address real-world security challenges.
- Worked on automation, vulnerability-related features, and secure application practices.
- Strengthened problem-solving skills while contributing to tool-based solutions in a security-focused environment.

Codage Heritage | Django Developer Intern

Jan 2025 - March 2025

- Worked on web application development using Python with Django and Flask frameworks.
- Built and tested backend features, APIs, and database-driven functionalities.
- Gained hands-on experience in writing clean code, debugging, and understanding real-world development workflows.
